#### A CANADIAN REMEDY

For Costiveness, Irregula, my and Debu of the Digestive Organs, Indusing Headache, assitude, Nervousness, General Prostration of the Mind and Body. Parolysis, &c.

A moment's reflection ought to convince a sensible man of the folly and danger of constantly desing with ( sthartic Medicines. The practice is pernicious and suici-dal. An experience of forty years has taught me that the constantly increasing evils of indigestion are fent-fully aggravated by the too free use of Cathartica. The American people are fast becoming a nation of dyspepties by their artificial modes of life. Drastic Catha tics increase the irritability, and prostrate the strength of the discative organs.

The Pills now offered are especially designed to all ay this irritability, and at the same time to invigorate a d strengthen all the functions of digestion, while they are gently laxative. They are anodyne, tonic and laxative They are so mild and invigorating that one is not remind ed by any disagreeable effects that he has taken medicine. Business Men, Students, Professional Men, Females, and all persons leading a confined or sedentary life, should

try them.

The undersigned Physicians, cheerfully certify to the high professional standing of Dr. Colby of Stanstead, one of the oldest and best Physicians, and to the executent qualities of his "Anti-Costive and Tonic Pills," which

we have used in our practice, and highly approve.

5463 of them manufactured last year—more than double the number of any other first class stove in one year, in the United States.

THEY contain all the improvements which are in all the first class stoves, and the advantages and improvements over other stoves are in part as follows: lst. The arrangement for broiling on the front hearth,
an improvement overlooked in other first class stoves. It has also the same arrangement for broiling on top. 24. A thorough ventilation of the Oven. 2d. Introducing hot air draught to the fire chamber

thereby increasing the draught of the Stove, quickening its operations, and enabling it to throw out more heat—a matter much and justly complained of in other Stoves.

4th. An important improvement in the application of the damper, which throws the heat around the oven.

5th. Much greater weight, consequently heavier plates, and more durable as well as handsomer castings.
6th. A draft damper at each end of the fire box, so that the fire is equalized, and one gridle will heat as quick as the other, also heaving the oven in half the time. 7th. Fire back protected by soap-stone, so it cannot In addition to the above improvements, it has all that is To always cause the Patient to Raise Freely combined in other first class Stoves, riz — Hot water Reservoir, Warming Closet, Roaster in front, Baker on top, Doors lived with best Russia Iron, &c., &c.
